Evasys - Evaluation WiSe 2016: Auswertungsbericht zu Ihrer Lehrveranstaltung

Sehr geehrte Frau Sherif,

im Folgenden erhalten Sie die Ergebnisse der Evaluation der Lehrveranstaltung "International Public Economics (WS 16/17) 5117a" im WiSe 2016.

Der Auswertungsbericht enthält die folgenden Bestandteile:

- 1) Legende Histogramm,
- 2) Fragen mit Auswertung als Balkendiagramm (Auswahlfragen) bzw. Histogramm (Skalafragen),
- 3) Profillinie mit Mittelwerten zu den Skalafragen,
- 4) Bildausschnitte mit Antworten auf offene Fragen (nach Fragen sortiert).

Dieser Bericht wurde automatisch erstellt.

Mit besten Grüßen

Barbara Brieger

1. What is your:

1.1) Gender

1.2) Field of study

1.3) Term

2. Questions regarding the lecture:

2.1) Avoidance of overlapping with other lectures.

2.2) The lecture is well-structured.

2.3) Lecture and tutorials are well-coordinated.

2.4) I learn something useful and important.

2.5) Subjective grade for the lecture

3. Questions regarding the lecturer:

3.1) The lecturer presents the subject matter in an understandable way.

3.2) The lecturer appears to be well-prepared.

3.3) The lecturer appears to be competent.

3.4) The lecturer is motivated and enthusiastic about the topic.

3.5) The lecturer takes time to explain and answer questions.

3.6) The lecture shows the relation between theory and practice.

3.7) Writing on slides and blackboard are well-structured.

3.8) The lecturer holds the lecture himself/herself regularly.

3.9) Subjective grade for the lecturer

4. Questions about you:

4.1) I am interested in the lecture's topic.

4.2) I put a high level of effort into this lecture.

4.3) My reason for choosing this lecture. (several reasons can be stated.)

4.4) I've attended the class:

4. Questions about you:

4.5) The best feature of this lecture is:

motivation of the lecturer

→ organization is very good

Reinforcement of what is taught in the lectures.

all problems are solved ~~with~~
in detail.

- Lecturer ☺ → very keen on explaining everything in detail
→ very eager to answer questions
- organization of course, information sent via email

The lecturer takes enough time to explain and seems very competent & enthusiastic about the topic.

Intuitive

→ no focus on complicated calculations!

Raisa is adorable! :)

- not too difficult in terms of mathematics
- intuition is important

great class,
made everything a lot clearer!

~~Topic & Lecturers~~

Topic & Lecturers

- lecturer CTA)
- great write-up, very structured ...
- friendly

well-structured and she was very prepared.

- takes a lot of time to explain calculations
- very friendly

Very nice ~~also~~ lecturer :)

solutions written down very detailed

Raisa Sherif explains matters very explicitly.
She cares about the needs of students and takes
pays attention.

4.6) My most urgent proposal for change would be:

slower writing down!

Nothing particular.

Calculation process is too much. It's better to explain it more verbally,
not just write down all calculation procedures.

- more exercises in the tutorial
- maybe not write every step of a derivation

- Mock exam on level of difficulty, not too simple

Slow down a little when writing

- ... but problem sets too easy, and too cluttered calculations.
- Suggestion: reading guides i. f. ex give paper as homework (also relevant for exam to incentivize)

Just copy us the results! Everyone is just sitting there copying the boring derivations... it's a waste of your and our time; we are all adults! (I know that's not your fault, Raisa, but this kind of tutorial sucks!)

A little bit slower. Not much, just a bit.

Also I think twice in the problem sets, ~~at the~~ we answered a question with an assumption that was given to us in the following part.

I would like for it to be in the instructions / ^{problem} information

Sometimes you were a bit fast with the calculations...

Slow down :)
